The The Neuroradiology Journal (NRJ) is a clinical journal publishing the current state of diagnostic and interventional neuroradiology worldwide. NRJ publishes original clinical observations, clinical practice, new techniques, selected reports, and articles on the ethical and social aspects of related health care. Original research published in NRJ is related to the practice of neuroradiology. Submission guidelines for the Journal include observational studies, clinical trials, epidemiological work, reports on health services and outcomes, and advances in (translational) and/or basic research.

For the policies on research and publication ethics not stated in these instructions, the Guidelines on Good Publication Practice issued by the Committee on Publication Ethics should be applied. The Editors reserve the right to request the original data obtained in the investigation. They also reserve the right to reject any manuscripts that may be considered unethical or inappropriate for publication.

Registration of clinical trial research: Any research that includes clinical trials should be registered with the primary national clinical trial registration authority accredited by WHO (http://www.who.int/ictrp/network/primary/en/index.html) or ICJME.

Disclosure: This is not intended to prevent authors with potential conflicts of interest from contributing to NRJ. Rather, the Journal will place on record any relationship that may exist with disclosed, or competing, products or firms. Disclosed information will be held in confidence during the review process and the Editors will examine any printed disclosure accompanying a published article. Authors are responsible for notifying the Journal of financial arrangements including, but not limited to, agreements for research support including provision of equipment or materials, membership of speaker bureaus, consulting fees, or ownership interests. It is important that disclosure statements be updated promptly to reflect any new relationships that arise after initial submission of the manuscript. If the study is supported by a commercial sponsor, the authors must document the input of the sponsoring agency in study design, data collection, analysis of results, interpretation of data, and report writing. It is important to specify whether the sponsors could have suppressed or influenced published results.

Peer review process: Papers are accepted on the understanding that they are subject to peer review, and, editorial revision, and, in some cases, comment by the Editors. Manuscripts are examined by independent peer reviewers. Articles and other material published in the Journal represent the opinions of the authors and should not be construed to reflect the opinions of the publisher.

Language: The official language of NRJ is English. Most papers in NRJ have been written by non-native English speakers, and they will also be read by many non-native speakers. For the purposes of clarity, it is strongly recommended that authors not fluent in English have their manuscripts professionally edited for English usage prior to submission. A professional editor will improve the English to ensure that author meaning is clear and to identify problems that require author review.

Copyright and purchase of Offprints: All articles published in NRJ are protected by copyright, which embraces the exclusive right to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in the Journal may be reproduced with or without written permission from the publisher. NRJ offers authors a complimentary hard copy and .pdf file of the issue in which their article is published, for personal use. To purchase offprints of articles published by NRJ please contact Serena Preti at serena.preti@centauro.it for a quotation.

Publication Types

Original Research Articles are full-length research papers, which are focused on important clinical problems and should address a specific topic in a scholarly manner. Such articles may be invited by the Editor or may be unsolicited reviews.

Review Articles are comprehensive, state-of-the-art papers focusing on important clinical problems and should address a specific topic in a scholarly manner. Such articles may be invited by the Editor or may be unsolicited reviews.

Case Reports/Technical Notes should be unusually educational and medically important. Although NRJ preferentially encourages submission of full-length Original Research Articles, the Journal will consider submission of a paper that overlaps substantially with a paper already published in print or electronic media as defined by the updated ICJME guidelines that cover overlapping publications of scientific manuscripts. When submitting a paper, authors should make a full statement to the Editor on all submissions and previous reports that might be regarded as redundant publication of the same or similar work. If authors believe that their manuscript may be considered redundant, they should address this issue in a letter to the Editor accompanying the submission. The authors should also explain in the letter how their report overlaps already published material, or how it differs. Copies of such published material should be included with the submitted paper to help the Editor examine the possibility of redundant publication. If redundant publication is attempted without such notification, authors should expect editorial action to be taken.

Letters to the Editor contain constructive comments or criticism of a specific paper published by NRJ. Letters dealing with subjects of general interest within the field of NRJ, or personal opinions on a specific subject within the ambit of NRJ, may also be accepted.
Electronic submission of manuscripts

NRR provides an electronic submission system (Editorial Manager) and expeditious peer review. Manuscripts should be submitted electronically to the following URL: http://www.editorialmanager.com/nrr/. Questions about manuscripts under consideration may be addressed to the editorial office:

The Neuroradiology Journal
Centuro s.r.l.
Via del Pratello, 8
I-40122 Bologna - Italy
Fax: +39 051 220099
E-mail: marco.leonardi@centauro.it

All authors listed on the manuscript must complete forms, found within Editorial Manager entitled Conflicts of Interest/Disclosures, Copyright Transfer Agreement, Financial Support, Exclusive Publication Statement, and Author Contribution Form.

Submissions not containing completed forms from every author will not progress to peer review. Prior to submitting any paper, please follow the instructions given below. Please note that an e-mail address must have an e-mail address to use the online submission system.

Manuscript Preparation

Original research should be organized in the customary format, as described below. The text of the manuscript should be submitted as a single document with the following sections (in order):

1. Author Information Page (First page)
   - Full names, address, affilations, highest academic degree earned by each author, authors' affiliations, name and complete address for correspondence, address for reprints if different from address for correspondence, fax number, telephone number, and e-mail address.

2. Acknowledgments and Funding Page (Second page)
   - The Acknowledgments section lists all funding sources for the research, the study, and details substantive contributions of individuals. The authors must reveal all possible Conflicts of Interest/Disclosures.

3. Title Page (Third page)
   - The full title, itemized list of the number of tables, the number and types of figures, and three-to-five key words for use as indexing terms should be included. Appropriate key words should be selected from the Medical Subject Heading. The word count of the text should be specified.

4. Structured Summary
   - Do not cite references in the Summary. Limit use of acronyms and abbreviations. The word count should be equal to or less than 250. The Summary should have the following headings: Purpose (rationale for the study), Materials and Methods (brief description of materials and methods), Results (the significant results), and Conclusions (succinct statement of data interpretation).

5. Text
   - Typical main headings include Introduction, Materials and Methods, Results, Discussion, and Conclusions. Abbreviations must be defined at first mention in the text, tables, and figures. The complete names and short addresses of manufacturers of any equipment used in Materials and Methods must be supplied. If animals are used in experiments, state the species, the strain, the number of animals used, and any other pertinent descriptive characteristics. If human subjects or patients are employed, provide a table with relevant characteristics. When describing surgical or neurointerventional procedures on animals, identify the pre-anesthetic and anesthetic agents used, and state the amount or concentration and the route and frequency of administration of each agent. Generic names of drugs must be given. Manuscripts that describe studies on humans must indicate that the study was approved by an Institutional Review Committee and that all subjects gave informed consent. Reports of studies on both animals and humans must indicate that all procedures followed were in accordance with institutional guidelines.

6. References
   - Citations should be listed in order of appearance in the text, and between square brackets { }. Journal titles should be abbreviated according to Index Medicus. For citation rules not specified here, authors should refer to the NLM Style Guide for Authors, Editors, and Publishers (http://www.nlm.nih.gov/citingmedicine).
   - Journal article: if the number of authors is more than three: Geibprasert S, Kriens T, Pereira V et al. Clinical characteristics of dural arteriovenous shunts in 446 patients of three different ethnicities. Intervent Neuroradiol 15: 395-400, 2009.

7. Tables
   - Each table must be typed on a separate sheet and double-spaced, if possible. Tables should be numbered using the Arabic system, followed by a brief informative title. Use type of the same font and size as employed in the text. Include footnotes at the bottom of each table. Tables must be numbered in the order cited in the text. Tables should not duplicate data given in the text or figures.

8. Figures Legends
   - Provide figure legends on a separate sheet. Legends must be double-spaced, and figures must be numbered in the order cited in the text.

9. Figures
   - Figures should preferably be submitted online in .tiff format to: http://www.editorialmanager.com/nrr/. The time required to send files will vary depending on the number and size of the files.
   - Digital images (originals or images acquired by a scanner) must meet the following criteria:
     - Black-and-white figures: Images must be acquired using the gray scale with a minimum resolution of 300 pixels per inch or 150 pixels per cm. Images must have a base of at least 8.1 cm for one item or a minimum base of 16.9 cm for several items.
     - Color figures: Images must be acquired using the full color CMYK method with a minimum resolution of 300 pixels per inch or 150 pixels per cm. Images must have a base of at least 8.1 cm for one item or a minimum base of 16.9 cm for several items. The RGB method is recommended for video reproductions only, as the quality of printed figures is poorer.
   - Images must be saved in .tiff format. Images in .jpg format are not acceptable as details tend to be lost upon scanning, even at high resolution. Image definition also depends on the enlargement factor. Thus, a large low-resolution image can be proportionally reduced (by 24%) for publication, thereby permitting optimal presentation in print. However, enlargement of a small high-resolution image will highlight all flaws, yielding a pixelated effect.
   - Do not submit figures already paged in Word, PowerPoint, or other documents, or images inserted in web pages. Such images are of low resolution and are unsuitable for printing.
   - Figures in .dcm (Dicom) format may be submitted as .dcm or .tiff files. The editorial office will process such images for printing.
   - Illustrations may be compressed using the StuffIt, Aladdin, or Zip programs.
   - Do not label an image with arrows, numbers, or letters, but rather indicate on a duplicate copy or a sketch where such indications are desired.

Authors are advised to refer to the Journal guidelines when formatting their work. Otherwise the editorial office may return a submission to the authors for improvement before any Editor is assigned.

If it is not possible to send figures via the Internet, images may be sent by express courier in one of the following formats:

- Original x-ray films, slides, or glossy or opaque prints. Clearly indicate on the back of the image the first author's name and the number corresponding to the figure caption and citation in the text.
- Figures may be submitted on a CD-ROM or DVD, copied in ISO90006 format legible on both PC and MAC. Floppy disks are not recommended. Clearly indicate on one side of the figure both the top of the figure and the figure number. Do not label the actual image with arrows, numbers, or letters, but rather indicate the top and figure number on a duplicate copy or on a sketch. Do not cut or attach figures with adhesive tape or use paper clips. If images are sent offline, thumbnails of the images should be uploaded as a submission item online, together with the manuscript, to allow the publishers to reserve space for the original high-resolution images. Authors are reminded that manuscripts must be sent online via Editorial Manager even when authors choose offline submission. All off-line material should be sent to the editorial office:

With respect to the article entitled: ____________________________________________
The authors certify that:

(Conflicts of Interest/Disclosures) The corresponding author must disclose all relevant financial, personal, and/or professional relationships with other people or organizations related to the subject of this article. Is there any actual or potential conflict of interest in the subject of this article?
No (___). If yes, please give details in the space below.

(Copyright Transfer Agreement) All rights, title, and interest in the manuscript, including copyright ownership, are transferred to Centauro Srl Publisher, Bologna. Authors reserve all proprietary rights (such as patent rights) other than copyright and the right to use parts of this article in their own subsequent work as soon as the article is accepted for publication. The article may not be published elsewhere without permission from the publisher.

(Financial Support) If the authors or their institution(s) is/are affiliated with any organization having a financial interest (including the provision of financial support) in the subject of this article, the authors should indicate (a) the name of the industry/institution providing support for the study, (b) the type of affiliation of the organization (stockholder, consultant, donor of honorarium, granting body, source of other financial or material support, provider of equipment, or other support category), and (c) that the authors had complete control of the data and information submitted for publication. Any other non-financial conflict of interest should also be disclosed to the Editor, with the understanding that the information may be published if deemed appropriate by the Editor.

No, I (We) do not have any conflict of interest related to this article (___).
If yes, (a) (_______) (b) (_______) (c) (_______).

(Exclusive Publication Statement) None of the material in this manuscript has been published previously or submitted for publication elsewhere prior to appearance in NRJ.

(Author Contribution Form) The corresponding author must certify that all authors participated in and contributed sufficiently to the conception and design of the work, and analysis of the data, as well as the writing of the manuscript, and assume public responsibility for the content of the paper. The corresponding author also certifies that all authors have reviewed the final version of the manuscript and approved it for publication.

Name (Print) Signature Date

This signed statement must be received before the manuscript can be processed for publication.
